The Musical Alphabet:

Notice the unique spacing of the notes.

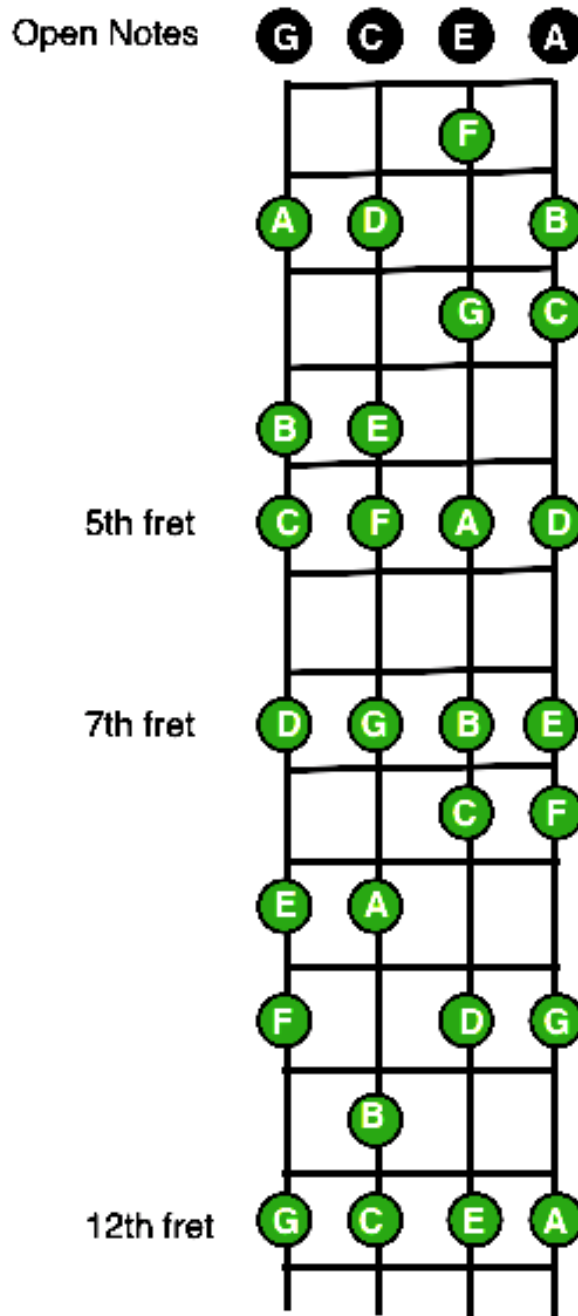

C D E F G A B C

What do I call the notes between notes?

You'll notice in the fretboard diagram that there are some white spaces on the ukulele fretboard chart. These notes are given names by using sharps and flats.

Let's look at the first fret on the A string, the note between A and B. It can either be called A sharp (A#) meaning the note just above A or it can be called B flat (Bb) meaning the note just below B. The second fret on the E string can either be called F# (F sharp) or Gb (G flat).

You'll run into sharps and flats when you are talking about the notes in chords or scales so it's useful to know how to use them.
